

GAYATHRI VASAMSETTI

AI Engineer | Full-Stack Developer | LLM Apps • RAG • AI Agents • React • Angular • Python

Birmingham, AL • (205) 281-0204 • gayathrivasamsetti555@gmail.com • linkedin.com/in/gayathri-vasamsetti-b8a461225

Live Project: huggingface.co/spaces/gayathrivasamsetti555/ResuMind (guest login — no sign-up needed)

Work Authorization: F-1 OPT • STEM Extension Eligible (up to 3 years) | CPT/OPT Sponsorship Eligible • Remote-Ready

PROFESSIONAL SUMMARY

Full-stack developer turned AI engineer with 2+ years of production application development (C#/.NET, React, Angular, Node.js) at Deloitte and active deployment of GenAI applications. Shipped ResuMind — a live, production AI resume analyzer built with Anthropic Claude API, Google Gemini API, and Streamlit, featuring ATS scoring, keyword gap analysis, and AI-powered bullet rewriting. Building RAG pipelines (LangChain, ChromaDB), AI agents (LangGraph, MCP), and fine-tuned models (LoRA/QLoRA). Uses Claude Code and GitHub Copilot daily as engineering partners for code generation, refactoring, and debugging. Azure AI certified (AI-900, AZ-900). M.S. Computer Science, Anderson University (Aug 2026). Rare combination: can build the full-stack front-end, the LLM back-end, and ship it end-to-end independently.

TECHNICAL SKILLS

AI & GenAI: Large Language Models (LLMs), Generative AI, Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agents, LangChain, LangGraph (building), Model Context Protocol (MCP), Anthropic Claude API, Google Gemini API, OpenAI API, Hugging Face, ChromaDB, Pinecone, Vector Databases, LoRA/QLoRA Fine-Tuning (building), Claude Code, GitHub Copilot (daily use)

Front-End: React.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, Streamlit, Async API calls (fetch/axios), REST API integration, Responsive design

Back-End & APIs: C#, .NET, ASP.NET (familiar), Python (Pandas • NumPy • Scikit-learn), FastAPI, Flask, Node.js, Express.js, REST APIs, GraphQL (familiar), SQL

Data & Databases: SQL Server, Oracle, MySQL, PostgreSQL (basics), NoSQL & Vector Databases (ChromaDB, Pinecone), ETL Pipeline Design, Data Engineering, Power BI (DAX • Dashboards), Statistical Analysis, Exploratory Data Analysis

Cloud & DevOps: Microsoft Azure (AI-900 • AZ-900), AWS (EC2 • RDS • S3 • IAM), Azure DevOps (Repos • Pipelines • Boards), CI/CD (GitHub Actions), Docker (in progress), Git, GitHub, Hugging Face Spaces

Practices: Agile/Scrum, JIRA, Pair Programming, Mob Programming, Code Reviews, Prompt Engineering, AI-assisted development, Cross-functional collaboration

PROFESSIONAL EXPERIENCE

Data Analytics & Research Intern | International Sibling Society (ISS) — 501(c)(3) | Remote Jun 2026 – Present

Python • Power BI • SQL • Claude Code • GitHub Copilot • Streamlit • Anthropic API • Gemini API

- Designed, built, and deployed ResuMind — a live AI resume analyzer (huggingface.co/spaces/gayathrivasamsetti555/ResuMind) — using Anthropic Claude API and Google Gemini API; features ATS scoring with transparent math, role-specific keyword gap analysis (hard + soft skills), priority improvements, and AI-powered bullet rewriting suggestions. Guest login available; resumes never stored.
- Built automated data collection, validation, and transformation pipelines across global research datasets spanning 190+ countries; enforced GDPR/CCPA compliance at every pipeline stage.
- Delivered 5+ Power BI dashboards and automated KPI reporting frameworks, translating complex research data into clear insights for non-technical international stakeholders.
- Use Claude Code and GitHub Copilot daily for code generation, refactoring, test coverage, and pipeline debugging — reducing routine development time by an estimated 25% over 6+ months of production AI-assisted engineering.

Full Stack Developer | XIN-I-FIT Information Technology (Deloitte)

Jul 2023 – Dec 2024

C# • .NET • React • Angular • JavaScript • TypeScript • SQL Server • Azure DevOps • GitHub Copilot • CI/CD

- Built and maintained production-grade web applications using C#/.NET back-end services with React.js and Angular front-ends, integrated with enterprise SQL Server and Oracle data sources serving Deloitte clients.
- Integrated REST APIs via fetch/axios from React and Angular front-ends into backend services — the same async API integration pattern used in modern AI front-end development with LLM endpoints.

- Used GitHub Copilot daily to accelerate code generation, refactor legacy components, and speed up debugging; wrote Python and C# automation scripts reducing manual processing overhead by 90%.
- Collaborated through pair programming and structured code review with senior developers; managed source control and CI/CD workflows across GitHub and Azure DevOps (branching, pull requests, pipelines, work-item tracking).
- **Recognized with Best Employee Performance Award** for full-stack development excellence and cross-functional delivery (Dec 2023).

Application Developer | XIN-III-ANALYST (Deloitte)

Jan 2023 – Jun 2023

C# · JavaScript · HTML · CSS · SQL · JIRA · Pair Programming

- Built front-end features for internal business applications (HTML, CSS, JavaScript) with C# back-end fixes; paired with senior developers in hands-on pair-programming sessions to troubleshoot, ship enhancements, and document workflows.

Data & Systems Intern (IoT Infrastructure) | Milatronics Pvt Ltd

Mar 2022 – Oct 2022

- Developed automated data collection and migration pipelines from live IoT sensor streams into analytical systems; performed root-cause analysis on data anomalies and validated sources before downstream processing.

PROJECTS

ResuMind — AI Resume Analyzer ★ LIVE — huggingface.co/spaces/gayathrivsamsetti555/ResuMind Apr 2026 – Jul 2026

Python · Streamlit · Anthropic Claude API · Google Gemini API · pypdf · Hugging Face Spaces · GitHub

- Built and deployed a full-stack AI application that analyzes resumes against specific job descriptions using LLMs. Features: ATS compatibility score with transparent scoring math, missing hard skills (role-specific), missing soft skills (role-specific), priority improvement actions ranked by impact, and AI-powered bullet rewriting suggestions.
- Built two versions to compare LLM provider behavior on identical structured JSON prompts: Claude (Anthropic) version on GitHub, Gemini (Google) version live on Hugging Face with guest login (no sign-up required; resumes analyzed in-session and never stored).
- Engineered reliable structured JSON output from LLMs via careful prompt design; handled edge cases including scanned/image-based PDFs that break standard text extraction.

GitHub: github.com/gayathrivsamsetti555-lab/ResuMind Live: huggingface.co/spaces/gayathrivsamsetti555/ResuMind

RAG-Based Document Q&A System

Jul 2026 – Present

Python · LangChain · ChromaDB · Pinecone · Anthropic Claude API · Streamlit · AWS Bedrock · Claude Code

- Building a full retrieval-augmented generation pipeline: document ingestion → chunking → embedding → vector storage (ChromaDB/Pinecone) → semantic retrieval → Claude-powered answer generation with source citations and zero hallucination.
- Optimizing chunk size, overlap, and retrieval strategy (n_results tuning) to maximize answer faithfulness; implementing 'answer only from context' prompt guardrails to prevent LLM hallucination.

AI Automation Pipeline with GenAI Integration

2026

Python · LangChain · MCP (Model Context Protocol) · FastAPI · GitHub Actions · Claude Code · GitHub Copilot

- Designed and deployed a production AI agent pipeline using LangChain, Model Context Protocol (MCP), and FastAPI for multi-step reasoning, tool use, and structured verifiable output generation.
- Deployed FastAPI inference endpoint on Hugging Face Spaces with CI/CD automation via GitHub Actions; built using Claude Code and GitHub Copilot as primary AI-assisted development tools throughout.

RetailIQ — Data Engineering & Analytics Platform

May 2026 – Jun 2026

Python · SQL Server · Power BI

- Executed end-to-end data engineering: audited source data, built a structured data mart with single source of truth, and delivered interactive Power BI dashboards with automated data-quality validation and monitoring.

Predictive Modeling — Epileptic Seizure Detection

Jun 2022 – May 2023

Python · Pandas · Scikit-learn · Statistical Analysis

- Built and evaluated ML classification models on biomedical time-series data; applied cross-validation and reported F1, AUC-ROC, and precision-recall metrics on imbalanced medical datasets.

EDUCATION

M.S. in Computer Science | Anderson University

Jan 2025 – Aug 2026 (Expected)

Relevant coursework: Machine Learning · Data Analytics · Statistical Analysis · Database Management Systems · Cloud Computing · Data Mining · Software Engineering

B.E. in Electronics & Communication Engineering | Velagapudi Ramakrishna Siddhartha Engineering College

CERTIFICATIONS

▶ Azure AI Fundamentals (AI-900) — Microsoft	2024
▶ Azure Fundamentals (AZ-900) — Microsoft	2024
▶ Claude Platform 101 & Claude 101 — Anthropic	2026
▶ AI and Data Science Job Simulation — BCG X × Forage	2026
▶ AI Fundamentals — IBM	2026
▶ Software Engineering Job Simulation — Wells Fargo × Forage	2026
▶ Cloud Security Foundations — AWS	2024
▶ AI for Everyone: Deep Learning — DeepLearning.AI — Coursera	2023
▶ Data Science for Engineers — NPTEL	2023

ACHIEVEMENTS

- Best Employee Performance Award — Deloitte, recognized for full-stack development excellence and cross-functional delivery (Dec 2023)
- AIR-05 — National Engineering Olympiad (NEO), National Level (Dec 2021)
- Excellence in Entrepreneurship — IIT Kanpur (Dec 2020)
